## Projects

### Spam review detection using spam filtering algorithm

Many businesses and software sectors store their data in Social networking creation provides the customer with an ability to share his or her views. That means the organization can't monitor the contents of the virtual universe now. Solving these issues by Spam detection algorithm.

Operating System : Windows7/8/10  
Application Server : Apache Tomcat7.0  
Coding language : JAVA (JDK 7.0)  
Database : MySQL 5.0  
IDE : Eclipse Luna

### E-commerce shopping website

Our project is an e-commerce shopping website UI that aims to provide customers with a seamless shopping experience. Developed a website to enable customers to order fresh vegetables online and get them delivered to their doorstep. The website features a user-friendly interface. The website allows customers to browse and purchase products online.

#### Technologies Used:

The website was created using HTML, CSS, and JavaScript.
